About This Game

World class adventurer Jane Sinclair will face her greatest challenge yet in the mysterious city of Adera. Help Jane solve exciting puzzles, collect hidden artifacts, and explore the environments to unlock the secrets of this new-found civilization.

This episodic story begins when Jane receives a desperate message from her long-missing grandfather. Using nothing but her wits and a strange stone orb to guide her, Jane sets out to find her grandfather before it's too late.

- Dozens of unique puzzles and fantastic environments to explore!
- AAA production with incredible 3D graphics, captivating story, professional voice acting, and more!
- Over 10 hours of gameplay and hundreds of hidden objects to collect!

A gem of game!

If you like adventure puzzle hidden object games that are different from your regular point and click game this is it. You really have to investigate every scene. Some scenes allow you to move the camera around and others are stationary but all area have items you need to complete puzzles and tasks to move forward. (There are collectibles in each scene that are extras for the achievements.)

The graphics are superb, crisp, and clear. the voice acting is excellent. The music score fantastic. There is all kinds of different puzzles ranging from easy to hard. I think there is different settings you can play the game on. So it can range from having some assistance to none at all. I liked the not everything is given to me on the less hard settings. I actually had to look for items. There is NO map but it is easy to navigate and most items in the vicinity you are playing in.

I found the game is broken into episodes. The story is very intriguing. I know it's held my attention even though I've only played the first episode. I can't wait to finish the other ones.

I highly recommend this game. The developers stepped outside the box when it making the point and click puzzle game. I hope they make more like this in the future.. Jogo leve e divertido. Inovador a cada puzzle.
