0.9 Code: -Hi guys here is a fix v1.5 of the pw-error, it will work both 2.3+ and 2.1. -It is a mod to change a few parts of skidrow, just extract the archive and follow these instructions. -Both of these versions will crash if you have any 1 on 1, that is you have any players in that match and they happen to turn you invisible while in one on one, it does not matter if the other person is playing with the invisible class or not, it will crash. -And I am leaving the v1.0 a.k.a the original version on this file, because I don't want to have to install that separately, it is just a simple merge of the 2.3 files. -Also the second version may crash because of the fixes made to 2.3 if you are playing with patch 2.2 to 2.3 and above. -Somewhere in the list if a posts I did see that other people have that issue, but I don't want to call every single person I know on skidrow 2.3+ with these questions, because the game is not meant to be played with 1 on 1 and people don't know that this may happen. -I will be testing if the new version that I will upload in the next few days will solve this problem and if it will I will remove it from this list and upload the new one, but if that doesn't work I will upload it with another version as well. -Somewhere in the list if a posts I did see that other people have that issue, but I don't want to call every single person I know 82157476af
